Animal Tracks Match Game

Two Ways to Play

Option One: Hold paper with narrow ends at top and bottom (portrait orientation). Cut along the horizontal line and fold each strip along the vertical center line. This makes a card with the animal on one side and their tracks on the other. Stack the cards track side up; try to identify the tracks and flip the card over to see if you’re correct.

Option Two: Carefully write the name of each animal on the back of their tracks. Cut all cards apart. Mix them up and then try to match the track to the animal.

Visit a nature preserve and see if you spot any animal tracks.
